PERSONAL PROFILE

I am a third year student at the University of Kabianga currently pursuing Computer Science Degree. I am very passionate about technology and ready to harness it's poer to change lives. I have done some few projects on web development, some for fun, others for clients majorly in my community.

CAREER OBJECTIVE

Seeking for a job that will help e grow into my full potential and use my acquired skills to change the livelihoods of humanity.

EDUCATIONAL BACKGROUND

Sept. 2021 - To date: University of Kabianga, Kericho

Award: Bachelor's Degree in Computer Science

WORK EXPERIENCE

April 2024:   Developed an online platform called Kabianga360 with some of my course mates. It had three entities : Tenants, landlords and shop owners. It allowed administration to keep records of residents and also allow new comers to make a previsit to the area and book residentail place of interest. It has an advantage of convenience. It also allowed shop owners to create shops similar to shopify and reach their customers. Used Django framework for the back end

April 2024:	Created a portfolio website using HTML, CSS, and JavaScript, It serves as a platform to introduce myself, share my projects, and provide information about my education and internship.
October 2023:	Played a key role in launching the tiBERbu EHR system at Kapkatet Hospital, handling data entry and configuration, gaining hands-on experience in healthcare IT, and strengthening data management and system implementation skills.
April 2023:	Developed a management system for vuno kuu factory to easen the record keeping at the factory. This involves registering every member to the system, then every member is required to memorize only the registration number that will be used for every weight registered next time for coffee berrires brought. It also enabled automatic calculation of each memebers earnings..
